"Yes. And I will forgive you, if you will go now, at once—and will promise me never, never to come here again. I do not permit anybody to come here to see me."

"All right, lady. You're on. Just shake hands to prove to me that it's all right, won't you." Thanks. An' I know now that you won't say nothin' to the skipper—an' you can bet your sweet life I won't."

Rushton lingered in the doorway a moment, looking back at Kathadine, and she shot a smile at him. He murmured another good night, meant to be a tender one, and closed the door softly. Then she stood listening for his lout falls on the stairs, for there was no elevator, and in a moment more she heard his heavy tread returning, hastily and persenturally too, she thought!

demands of yesterday, as follows:

"When we were boys our mothers used to give us a bowl of mush and milk for supper, and we were better off for that plain but holesome diet. There would be no high cost of living to speak of if people would eat much and milk nowadays. But they won't. Yet I can see no better men physically or mentally now than we raised in those bygone days.

Then the women went to the markets with their baskets on their arms. They did not call up the grocer or the butcher on the telephone to deliver a 5-cent loaf of bread or a soup bone. The grocer and butcher must meet their expenses. People ask to be served and people must pay for it.

"Thrift has become almost an unknown quality with average people. They all want the best cuts of beef and the choicest vegetables and groceries, simple living will solve the high-cost-of-living problem."

All of which commercial point of view but agrees with that of Horace Fletcher in his new analysis of "Fletcherism." Mr. Fletcher aims to educate us in "how to use the head as well as the stomach in digesting food," thereby gaining health and youth with the increase in years.

gaining health and youth with the increase in years.

The points of these men who know are well taken. Never before have there been such a number of food experts, teachers of domstic science, books and pamphlets on nutrition and food values &c., as today. Never has there seemed such a NEED for periods of fasting, going without lunches, eliminating breakfast and observing all forms of proper living in the direction of HEALTH.

And all seem to point "back to the

desirable. Reducing the cost of living is just plainly up to you and me.

Many a time we pity ourselves when we think we must eat things that do not cost much. If we but realized it, we are rich, indeed. The ills resulting from the less simble and expensive foods are well known and AVOIDED by those who would be healthy, wealthy; and wise.

Another means of economy is that designated by the president of the Housewives' League, Mrs. Heath, who commends "the woman with a dollar in her pocket."

She who persists in telephoning the butcher, baker, and candlestick maker for her purchases certainly PAYS for that service nowadays in some way of other. But when she can be on the spot and choose the produce, she often finds bargains she had not known about and her dollar reaches further than she had expected.

So it has now come to pass that on all sides one friend is dieting to get thin, another avoids rich foods for fear of this, that, or other malady he has suffered on account of them, and the general tendency is to THINK TWICE BEFORE TOU EAT ONCE.

Yet to go further and urge simple menus in the daily living not only makes for the steady qualities that characterized our people of "bygonedays." but is certainly a step in CUTTING DOWN the high cost of living. In this effort the rich man is on a French Doctor Finds
